April 2011 Edition

Spring Is Near

As we all hope that the spring season is starting and quoting activity should pick up we would like to remind you of a few things that should be factored into all your quotes. First, the new UL 325 and ASTM F 2200 safety standards, for both gate and door operators. Not following these safety standards only increase your liability risks. Second, is emergency vehicle access, many towns require this and those that do not should be educated on it. And third, are surge suppressors, with more equipment being solid state these days surge protection is more important than ever. Power Door has surge suppressors for all your equipment. If you have questions on these or any other topics please do not hesitate to call us at Power Door Products.

Product Spot Light

FAAC

FAAC is now using improved arctic grade hydraulic oil for cold temperature applications. Power Door only uses arctic grade oil. The oil is clear, not red as we have gotten

use to and the serial number ends in a 77 for operators using the arctic oil. The standard oil is pale pink so if you get that let us know and we will exchange it. Power Door will continue to use the deep red arctic oil for its repairs for the time being. We have had great success with the red oil and will see how the new clear oil works.

POWERMASTER "CSG"

The CSG is a heavy duty commercial slide gate operator for a very competitive price. Rated for gates up to 30ft wide and weighing up to 1200lbs., the CSG can handle most of your slide gate projects and with a list price of only \$2843.08 does it very competitively.

The CSG also has a smaller lighter frame than its big brother the "SG" making the installation easier. The CSG uses # 41 drive chains and comes with a hand crank for manual operation. The CSG uses the PC-2004 circuit board found in the SG and heavy duty 1/2HP Leeson PSC motor for high cycle trouble free operation. WE ALL KNOW HOW COMPETITIVE IT IS OUT THERE, LOOKING FOR THE RIGHT EQUIPMENT FOR THE JOB WITHOUT SACRIFICING QUALITY IS ONE WAY TO STAY COMPETITIVE.

REMINDERS!

PowerMaster

We are happy to say that Power Door has a Full line of PowerMaster Door & Gate Operators as well as Parts available for immediate shipment.

Rosslare

Power Door has a full inventory of Rosslare access control products, including card readers, keypads and controllers that are priced very favorably. If you have questions or would like a quote please give us a call.

PRICE CHANGES

Price Increases

FAAC repairs fee will increase to \$200.00 list and repair parts will increase by 5% effective April 1st.

Doorking has raised some of their prices so please call us to confirm prices.

Hysecurity will increase their prices on the SlideDriver and Strong Arm by 2% effective May 1, 2011. Prices for All Options, Accessories & Parts will go up or down based on material costs.

While we do our best to keep our books and website current, increases from manufacturers often come in without notice. We encourage you to call for current pricing. A call to us will help ensure that nothing is left out and that all components are compatible.

Beginning April 1, 2011, Power Door Products will impose a \$25.00 drop ship fee for any orders that are required to be drop shipped.

FAAC REPAIRS

Remember, Power Door is an FAAC Authorized Repair Center. Please call our offices to arrange for quick and efficient repairs of all your FAAC Arms.
